## research: enabling haptic experiences *anywhere, anytime*

My research aims at advancing a new generation of **haptic devices** (e.g., those that can create the sense of touch, forces, etc.) that exhibit properties that we became used to expecting from our mobile phones & wearables, **such as extreme mobility, availability anytime, etc.** To advance haptics into this new territory and grant it these novel properties, I engineer custom-made interactive devices that, for instance: allow to feel touch in mixed reality without encumbering our fingerpads, or even haptic devices with virtually infinite battery life. I have published this work as **13 papers (six as the first author)** at top Human-Computer Interaction (HCI) conferences including **ACM CHI & UIST**, with **two Best Paper Awards and four Honorable Mention Awards**.

## education & employment

- 2019 - **PhD student (Computer Science) at University of Chicago**  
present Advisor: Prof. Pedro Lopes
- 2018 Research Assistant at National Taiwan University
- 2018 **MS (Degree Computer Science) at National Taiwan University**  
Thesis: Shape-changing Haptic Interfaces for Virtual Reality  
Advisor: Prof. Bing-Yu Chen
- 2016 **BS (Degree Electrical Engineering) at National Taiwan University**

## academic awards

**Best Paper Awards:** UIST 2021, UIST 2020  
**Best Demo Awards:** UIST 2021 (x2)  
**Honorable Mention Awards:** UIST 2022, CHI 2021, CHI 2020, UIST 2019

## publications
